$$\begin{split} & \text{Im} [-] = \text{U}[r_-, \, \delta_-, \, h_-, \, \sigma_-] := \text{Exp} \Big[(r - \delta) \, h + \sigma \, \sqrt{h} \, \Big] \\ & \text{d}[r_-, \, \delta_-, \, h_-, \, \sigma_-] := \text{Exp} \Big[(r - \delta) \, h - \sigma \, \sqrt{h} \, \Big] \\ & \Delta[r_-, \, \delta_-, \, h_-, \, \sigma_-, \, S_-, \, \text{Cu}_-, \, \text{Cd}_-] := \text{Exp} [-\delta \, h] \, \frac{\text{Cu} - \text{Cd}}{\text{S} \, (\text{u}[r, \, \delta_-, \, h_-, \, \sigma_-] - \text{d}[r, \, \delta_-, \, h_-, \, \sigma_-]} \\ & \text{B}[r_-, \, \delta_-, \, h_-, \, \sigma_-, \, \text{Cu}_-, \, \text{Cd}_-] := \text{Exp} [-r \, h] \, \frac{\text{u}[r, \, \delta_-, \, h_-, \, \sigma_-] - \text{d}[r, \, \delta_-, \, h_-, \, \sigma_-]}{\text{u}[r, \, \delta_-, \, h_-, \, \sigma_-] - \text{d}[r, \, \delta_-, \, h_-, \, \sigma_-]} \\ & \text{OptionPrice} \, [\Delta_-, \, B_-, \, S_-] := \Delta \, S_- + B \end{split}$$

Figure 10.5

Input the data first

Contruct the binomial tree

```
log(*) := Su[r, \delta, h, \sigma]
Su[r, \delta, h, \sigma]^2
Su[r, \delta, h, \sigma]^3
Out(*) := 50.0711
Out(*) := 61.1491
Out(*) := 74.6781
log(*) := Sd[r, \delta, h, \sigma]^2
Sd[r, \delta, h, \sigma]^3
Out(*) := 35.4114
Out(*) := 30.5846
Out(*) := 26.4157
```

```
ln[\cdot] := Su[r, \delta, h, \sigma] d[r, \delta, h, \sigma]
        Su[r, \delta, h, \sigma]^2 d[r, \delta, h, \sigma]
        Su[r, \delta, h, \sigma] d[r, \delta, h, \sigma]^2
Out[ • ]= 43.246
Out[ • ] = 52.814
Out[ • ]= 37.3513
```

Backwards computation

Node 11

```
