Chapter 19. Monte Carlo Valuation

## Chapter 19. Monte Carlo Valuation

- § 19.1 Computing the option price as a discounted expected value
- § 19.2 Computing random numbers
- § 19.3 Simulating lognormal stock prices
- § 19.4 Monte Carlo valuation
- § 19.5 Efficient Monte Carlo valuation
- § 19.6 Valuation of American options
- § 19.7 The Poisson distribution
- § 19.8 Simulating jumps with the Poisson distribution
- § 19.9 Simulating correlated stock prices
- § 19.10 Problems

## Chapter 19. Monte Carlo Valuation

- § 19.1 Computing the option price as a discounted expected value
- § 19.2 Computing random numbers
- § 19.3 Simulating lognormal stock prices
- § 19.4 Monte Carlo valuation
- § 19.5 Efficient Monte Carlo valuation
- § 19.6 Valuation of American options
- § 19.7 The Poisson distribution
- § 19.8 Simulating jumps with the Poisson distribution
- § 19.9 Simulating correlated stock prices
- § 19.10 Problems

This section will be skipped for the interested students.
